DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: At line 5, the use of the phrase "thanks to which carrier the patterned-----when the isolating material is applied" is not proper to recite a limitation.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitation "the first side and the second side" in lines 9-10. There is insufficient antecedent basis for this limitation in the claim.

5. Claim 2 recites the limitation "the carrier" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Mahulikar et al (5,155,299).

Mahulikar et al disclose a process of making an electronic device including the step of covering (16) a substrate (14) including electronic device (12) having metallization side in order to form a cavity (22), wherein the covering layer could be patterned and affixed over the substrate with protrusion, wherein the covering layer comprises metal (col.3, lines 8-25 and figure 1).

Mahulikar et al also discloses that the covering layer is affixed with the substrate such that the edges of the cover layer are attached with the substrate except the cavity (see figures 1 and 2).

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1765

9. Claims 1 and 8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 7 of U.S. Patent No. 6,621,163. Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention in the patent 6,621,163 broadly encompasses the instant invention.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mahulikar et al (5,043,534) discloses a process of packaging metal electronic device with a covering layer; Zhang et al (6,146,917) disclose a process of making micro electronic device including the step of removing sacrificial layer to form a cavity and the device.
